DETAILED ACTION

Continued Examination under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/29/2009 has been entered.
2. Applicant has amended claims 1, 7, and 13. Claims 1,4,6,7,10,12,13,17,18,20 and 22 are now pending.

Allowable Subject Matter

3. Claims 1, 4, 6-7, 10, 12-13, 17-18, 20, 22 are allowed (now renumbered claims 1-11).

REASONS FOR ALLOWANCE

4. The following is an examiner's statement of reasons for allowance: After reviewing the remarks made by the Applicant the Examiner finds the remarks to be persuasive. The most pertinent prior art Jose Melo et al (Viewpoint Independent Detection of Vehicle Trajectories and Lane Geometry Jose Melo, Andrew Naftel, Alexandre Bernardino, Jos6 Santos-Victor ICIAR - Porto, Portugal, Sep.29 - Oct.1 2004) and Renno et al (Learning Surveillance Tracking Models for the Self-Calibrated Ground Plane J. Renno, J. Orwell and G.A. Jones British Machine Vision Conference 2002) . Jose Melo et al discloses a method of analyzing video frames capturing a 3D scene

over time to automatically generate a road map of the 3D scene (see abstract) and detecting position of object in the video frames (section 1) and estimating road boundaries of the 3D scene using the object position to generate the road map (section 4). Renno discloses the "ground plane constraint" and estimating 3D transformation parameters for the object (section2-2.1 and figure 1) and predicting heights of "he object (section 2.2) The combination of cited references Melo et al and Renno et al do not teach or suggest the features of claim 1, 7 and 13 where ""estimating road boundaries of the 3D scene using a background image and the positions of the objects by filling a uniform color region starting from a foot of a position of an object of the objects and stopping when an edge pixel of the background image is reached". No other found prior art of record teaches or fairly suggests the combination of claimed elements. The Examiner finds no reason or motivation to combine the above references in an obviousness rejection thus placing the application in condition for allowance.

Any comments considered necessary by applicant must be submitted on later than the payment of the issue fee and to avoid processing delays should preferably accompany the issue fee. Such submissions should be clearly labeled, comments on statement of reasons for allowance.
